

***Here are some examples to help you get started developing your 30 second elevator speech.***

Hi, my name is Samantha Atcheson, and I am in my last year of secondary school. I hope to study Environmental Sciences next year. I'm looking for an internship that will allow me to use my research and analysis skills. Over the past few years, I've been strengthening these skills through volunteer work cleaning up our river. Eventually, I'd like develop education programs on water conservation awareness. I read that your organization is involved in water quality projects. Can you tell me how someone with my experience may fit into your organization?

Nice to meet you, I'm Alex Biondo. I'm currently a senior and am studying Computer and Information Science. I hope to become a computer programmer when I graduate. I had an internship, where I worked on several program applications with a project team. I enjoy developing computer applications that solve problems. The position you have listed in UO-JobLink seems like it would be a perfect fit for someone with my skills. Can I have a tour of your business so I can see what a career would look like in your industry? I want to see if there are additional classes I should take.

Hi, my name is Brad. I am currently a sophomore student attending San Marco Secondary school. In college I plan on majoring in business, specifically in the area of finance. This summer I did an internship with a local bank. I will be my class Treasurer when I return to school this fall. Ever since I can remember I have always had an interest in numbers and I feel certain that this is something I want to do in my future career. Next summer I'm hoping to get another internship learning more about business management. I also want a career working with people since I enjoy assisting others with their finances. What would be possible careers for me in this town?
